

ATHENS TECHNICAL COLLEGE

2018-2019

PREPARING FOR THE ACCUPLACER PLACEMENT TEST

1) Why is it necessary to take a placement test?

You are applying for college admission. To be successful, you will need to be able to function academically at a certain level in order to be ready for the college work you will be assigned by your instructors. The placement test measures basic skills in Reading Comprehension, Sentence Skills, Arithmetic, and Elementary Algebra. Your results will tell us whether or not you will need to take learning support courses before going into your credit classes.

2) Should I study for the placement test?

Yes! For review work in all four test areas, you can find study help from the Accuplacer website at <https://www.accuplacer.org>. Please click on the “Information for Students” tab. Accuplacer also has a Study App available for download that can help you get familiar with content and format of the test questions. You may also check the Athens Tech Testing Services page at www.athenstech.edu/studentaffairs/testing.

3) What is the name of the placement test?

You will be taking the ACCUPLACER, an untimed, computerized placement test. Because the test is untimed, there is no way to predict how long it might take you to complete it, but you should allow yourself at least a 3-hour period of time to be at the testing center. If you are unable to finish before the testing lab closes, you can return for another test session and pick up where you left off.

4) What should I bring to the test?

On your scheduled test date, you must arrive **15 minutes** prior to your test session and bring a picture ID with you. All other test materials will be furnished by the College.

5) Is it possible to receive accommodations on the test if I have a diagnosed disability?

If you believe you are eligible for any type of accommodation on the test due to a documented disability, please notify the testing office at 706-583-2728. In order to receive accommodations on placement testing, you must contact the Coordinator of Disability and Career Services at Athens Technical College as soon as possible at 706-355-5006 to learn about the College’s documentation requirements. Once we have received appropriate documentation of your disability, we will make arrangements to test you at a different time and provide you with all approved academic adjustments and/or auxiliary aids. We want to provide reasonable accommodations to anyone who is entitled to receive them, so please make sure we know about your situation before you take the test. If you have any questions about qualifying for this assistance, please contact us at 706-583-2728. Disability documentation is always considered confidential between the student and the Office of Disability Services. No information will be released without written permission of the student, except in those emergencies mandated by law.
